SIEMENS PANELS

OFFER THE FOLLOWING ADVANTAGES

- 15 or 21-inch TFT or Full HD displays, with high resolution and detailed interface for monitoring and control.
- Seamless integration with Siemens PLCs, drives, and other devices. This user-friendly software plat form enhances engineering eff ciency and reduces development time.
- Resistive touch or multi-touch gestures, such as pinch-to-zoom, swipe, and rotate, providing intuitive, tablet-like control.
- Extensive customization options for visualizations and control layouts, ideal for users who need a high degree of personalization.
- High ingress protection (IP65 or higher), ensuring durability in industrial environments that may be dusty or wet.
- Immediate technical support, fast delivery times.
